

HeartCode PALS :

Pediatric Advance Life Support

Pediatric Advanced Life Support (PALS) uses a series of videos and simulated pediatric emergencies to reinforce the important concepts of a systematic approach to pediatric assessment, basic life support, PALS treatment algorithms, effective resuscitation, and team dynamics.

Description

HeartCode PALS is the AHA's blended learning delivery method for the AHA's PALS Course. HeartCode blended learning delivers quality resuscitation education regardless of where providers are located and gives them more control to complete the course at their own pace. Providers first complete the online portion of HeartCode PALS and then complete a hands-on skills session with an AHA PALS Instructor or a HeartCode compatible manikin.

The 2020 Guidelines HeartCode uses a personalized adaptive algorithm that sets students on the most efficient path to mastery. Students follow a continuously adapting learning path that is personalized by their own inputs: their performance, and their self-reported confidence level related to each probing question. The course content is presented in the form of self-directed learning content, probing questions, and Cognitive Assessment Activities (CAAs).

Pediatric Advanced Life Support - HeartCode Complete (Online) PALS

Cognitive Portion – Online Learning

PALS learning modules and knowledge checks
Child and Infant eLearning scenarios with debriefing

Hands-on Skills Practice & Testing

Compressions and ventilations on high-fidelity
Child and infant CPR manikins

Results in AHA eCard

Curriculum Provider: American Heart Association

Certification Duration: 2 Years

Course Format: HeartCode™ Complete PALS meets the requirements for Initial or Renewal certifications

Cost: \$251.00

HeartCode® is the official American Heart Association (AHA) self-directed eLearning program allowing students to take PALS (Pediatric Advanced Life Support) online as an alternative to the traditional classroom-based courses

What's New with the 2020 Guidelines?

- Utilizes an adaptive learning format. The learning experience is based on existing knowledge and skills
- All content was developed by the American Heart Association and reflects 2020 scientific guidelines
- All content is aligned to the learning objectives of the current AHA HeartCode courses
- Responsive design ensures compatibility on mobile devices and tablets
- All curricula is contextualized for the in-hospital or pre-hospital learner
- Streamlined Cognitive Assessment Activity cases have replaced eSimulations

What's Covered?

- Respiratory Emergencies- Recognize and perform early management of respiratory arrest
- Shock Emergencies- Recognize and perform early management of shock
- Pre-Arrest Emergencies- Bradycardia, Stable Tachycardia, Unstable Tachycardia
- Cardiac Arrest- VF/VT, PEA- Asystole

Standardizing Skills Practice and Testing

Once the online portion of the HeartCode® course has been completed, students practice and test their skills by using the self-directed course with the HeartCode voice-assisted-manikin (VAM) system.

Training with VAMs provides students with real-time, objective audio feedback on their performance, adding a new level of realism and precision to CPR training.

Upon successful course completion, you will be issued an official AHA PALS Provider eCard valid for two years

How to Purchase and Schedule:

Please call **859-655-1606** to purchase the PALS HeartCode® complete online course and schedule your time slot to complete the required skills verification on the voice-assisted-manikin (VAM) system
